Foreword

Ladies and gentlemen!

National policies of nursing are compilation of guidelines to help develop knowledge in nursing provision to the people of Cambodia. This compilation will reveal to you on the definition of the policy, policy objectives, administration policy, improvement of nursing quality, proper nursing application at referral hospital, enhancement of communicable disease controlling, sanitation practices in the hospital and to make existence of nursing and midwifery structure at each referral hospital.

The compilation of national policies of nursing has maintained originally intention in enhancing knowledge of nurse and midwifery in nursing practices, pain-alleviating and the improvement of sanitation activities in the referral hospital. However, office of nurse and midwifery of the department of hospital service has contributed significant improvement to modify this compilation of more benefits and meaningful i.e. inclusion of related annex of major concepts and sample of evaluation sheet.

I do hope that this compilation of national policies of nursing will be of an ease instrument in nursing practices and much more advantages to all nurses and midwifery.

On behalf of the Ministry of Health, I am so delightful and believe that you as health officers will make all endeavors in implementing this policies contributing to the improvement of nursing and better sanitation practices at respective referral hospital.

Minister of the Ministry of Health

MD. Nuth Sokhom
